Age Group: 2 to 12 years

Footprint: 8' 8" long x 7' 2" wide x 3' 4" high

Use Zone: 19' 2" x 20' 8"

The Climb and Discover Cave is an ideal addition to any playground that is specifically aimed at young children. There is a capacity for a maximum of 16 children to use this piece of equipment at one time. The height is only 40 inches, too, meaning that children will be able to climb up and around the apparatus without any concern that they will hurt themselves if they fall. Children can also climb beneath the cave and through the holes on the side of the cave. It is a really easy way for children to improve their motor abilities and coordination, and also encourages imaginative play. It is easy to fit into an indoor or outdoor playground, so don't miss out on this great addition.
