### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Hop along the Pebble Path! Place this set of 12 pebbles to create a trail, a shape, or a pattern, and watch kids gleefully travel the path. They'll be able to work on their balance skills as they make their way from one pebble to the next, and they can also flex their creativity, pretending that the pebbles are rocks in a rushing river or safe platforms over a pit of lava.

When you purchase the Pebble Path, you can decide between a variety of quick-ship color options, including Pacific Blue, Sunglow Yellow, Hunter Green, beige, or alternating primary or neutral colors. Custom color variations will take up to 14 weeks to ship.

The pebbles can be installed at heights of 16 inches or less, accommodating older or younger kids, and the diameter of each pebble's top is 1 foot, plenty wide enough for a stable place to stand. Just make sure to install each pebble's pole in a hole at least 18 inches deep so that it stays secure. There's no specific recommended configuration to position your pebbles, but it is important to make sure that each is no more than 1 foot away from the next, allowing for a fun challenge that's still safe.

The Pebble Path is proof that fun can come in simple packages. Order yours today and get the best price with AAA State of Play!
