Use Zone: 20' x 20'

Enhance your playground with our Geo Dome Climber, a classic playground attraction that children love to climb on. This unit stands 4 feet high and is constructed using 1-inch OD galvanized steel pipe, ensuring durability and stability for every climb. It's also available with customizable options to suit your style and safety requirements. To personalize your climber, we offer optional equipment including custom paint and polyethylene connection brackets. These additions not only add a personal touch but also enhance the safety and dimensions of the climber, as the brackets will add height and width to your unit.

Each Geo Dome Climber comes ready to assemble with easy-to-read instructions, making installation a breeze. For added safety, choose our permanent climbers, which include an anchor kit. This can be selected from the pull-down menu when placing your order. Permanent climbers are necessary for most commercial applications. With these customizable options, you can design a climbing dome that perfectly fits the aesthetic and functional needs of your playground.

This product, like all of the products we carry, is constructed from commercial-grade materials and made to last. But just in case, it also comes with a one-year limited warranty from the manufacturer.

If you're not quite sure that the Geo Dome Climber is the right choice for your play area, explore our variety of other climbing domes, such as the smaller Junior Geo Dome Climber or the Ultra Geo Dome Climber, a great choice for older kids. [\[Read More\]](#)
