COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

From one tropical isle to the next, the Walnut Woodland is a child's paradise. The structure, while completely connected, breaks evenly into two "islands" of play. On one, children are treated to a Straight Slide that is easily accessible via the Transfer Station for all children to use. A Jungle Climber provides another way to the slide as well as a backdrop for the hours of play children are sure to have. Directly across the centrally positioned Net Climber is another isle of fun. Children have more than the Net Climber available to them to reach the second isle. The Single Row Pebble Bridge will test children's balance and coordination almost as much as the Leaf Climber beside it. For those interested in a direct route, the Inverted Arch Climber takes children up to the 4-foot Straight Slide. The structure is packed with more than climbers and slides with imaginative activities like a Bubble Panel, Drum Panel and Store Panel. Just choose one of our set color palettes or design your own to bring your structure completely together.
