- Exceeds ASTM F1951
- 15-foot fall height protection - ASTM F1951
- Does not harden or freeze
- Available in multiple colors
- Made in the USA (New Jersey)

The Access A Mat is an all-new wheelchair accessible solution that is perfect for playgrounds. This unique surfacing solution offers 15-feet of fall height protection. Unlike many tile systems, the Access A Mat is manufactured right here in the United States. The Access A Mat is an environmentally responsible product, made of post-consumer recycled rubber and plastic. The tile system interlocks for easy installation over any existing surface. The tiles are available in an array of colors including black, blue, green, and more! The Access A Mat is used in addition to rubber mulch as it goes between two layers of rubber mulch, which keeps the rubber mulch in place and increases the accessibility of the overall safety surface. One Access A Mat is 36 inches by 60 inches and 2 inches thick.
