Use Zone: No use zone required.

It is important that children not only exercise their bodies, but also their minds. The Freestanding Ball Maze Panel is an essential part of play time as it allows kids to learn logic. The panel features a maze with a start and finish spot. A ball is guided through the maze as children spin the circle one way or the other. Once the ball hits the finish spot, guide it back to the start! The Freestanding Ball Maze Panel is designed to be used by children ages 2-12 years old.
