SALE \$59,820.00

Age Group: 5 to 12 years

Capacity: 36-40

Footprint: 28' x 29'

Use Zone: 41' x 42'

Bigger and older kids need more challenging playgrounds, and Caribou Falls is a recycled playground specifically created to meet the needs of kids ages 5-12. Offering more challenging elements such as a deep rung climber, pipe wall, and bigger slides, it is an ideal solution for such a diverse age range. There is a wave slide, veer slide, triple rail slide, and spiral slide. There are a lot of nooks and crannies to be explored as well, and here kids can find everything from creative play panels (driving, a café play panel, and a gear panel) to bridges and more. Two towers each have ribbed roofing and there is an ADA transfer station, along with two sets of DTD steps to allow accessibility. Crafted from durable materials, this playground has a 15-year warranty on many of its components along with a lifetime warranty on any of the recycled posts used. Customizable colors and a use zone of 41'x42' allow you to make this the dream play area for 36-40 kids at any time.
