

Apollo Kevlar Rubber Strap Swing Seat

MSRP \$208.00

SALE \$147.00

Age Group: 2 to 12 years

The patent pending S-140 Apollo Kevlar Swing Seat is unique to any existing playground products on the market today. Kevlar is used in body armor, and now playground swing seats, which helps make the S140 Apollo seat cut resistant. The Apollo Kevlar Swing Seat is tested to 10,000 pounds tensile strength, which means it will take just about anything you throw at it. Unlike other products like steel and plastic, Kevlar is not sharp when worn or vandalized. Stainless steel hangers give the Apollo Kevlar Swing Seat a finished construction unlike any other. Jensen offers a five year unconditional guarantee on the swing seat. The seat dimensions are as follows: 24-inch long x 6-inch wide x 5/16-inch thick. The seat is 30-1/4-inch hanger to hanger. A black EPDM coating covers the Kevlar material. Made in the USA. Available as shown in black only.
