

## Free Standing Ball Maze Panel

**MSRP \$1,650.00**

**SALE \$1,106.00**

### Highlights:

- Made for toddlers to elementary school aged children
- Primary or Neutral color schemes are available for quick ship
- Panel composed of harsh weather-resistant roto-molded plastic
- In-ground installation keeps everything in place and ready for use

**Age Group:** 2 to 12 years

**Footprint:** 4' x 3' 6"

**Use Zone:** No use zone required

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Free Standing Ball Maze Panel features a round, enclosed maze with a plastic ball rolling around in it. The maze is part of a rotating insert in the center of the panel which can be freely spun around using the knobs along its edge. Kids will rotate the circle back and forth to guide the ball to the center of the maze in this surprisingly challenging puzzle. Although the maze itself is fairly straightforward, the difficult part is using gravity to get the ball where you want it to go. And since there is no designated 'starting place' to the maze, there is no setup required. The ball can begin at any side of the maze, providing a different challenge each time. After finishing the maze, or any time the player decides they want a fresh start, the circle can be spun around quickly a few times to fling the ball to a random part of the maze. This way the panel stays exciting even after being completed several times. This particular panel comes in primary, neutral or a unique customizable color variation. Only the primary and neutral colors are available for quick ship, the custom color will take 10 - 14 weeks to arrive.
