

MyTCoat Expanded Metal Ashtray Pylon

MSRP \$263.00

SALE \$223.00

Highlights:

- Crossed metal pattern visually works at most venues
- Can be in-ground mounted or surface mounted
- Tray can contain lots of discarded cigarettes
- Steel constructed and comes in Industry Standard or Advantage coating

The Expanded Metal Ashtray Pylon is a convenient place for guests to dispose of their finished cigarettes. This benefits smokers and non-smokers alike, as it helps to reduce the smell of smoke and cuts down on the likelihood of your site's grounds collecting unsightly piles of discarded cigarette butts. It is a tall and decorative metal column that holds its collection dish above the ground and keeps it stable. This pylon is made of sturdy steel arranged in a diamond-shaped lattice with a lustrous protective coating applied as a finish. The deep basin of the ashtray ensures that the unit has a high capacity that can hold plenty of waste before needing to be emptied. This attractive stand-alone ashtray meshes well with many different kinds of interior and exterior locations, including parks, city centers, office break areas, and hotel lobbies.
