

## MyTCoat Steel Umbrella Base

**MSRP \$323.00**

**SALE \$275.00**

### Highlights:

- Stays out of the way of feet
- Flat shape adds extra balance
- Designed to handle the outdoor weather
- Heavy enough to add stability but still easy to move

---

Give any of our outdoor umbrellas the ability to stand up all on their own with this Steel Umbrella Base. The base is easy to use and install. It fits easily under most of MyTCoat's outdoor tables that have a pre-drilled hole for an umbrella. This wide base gives the umbrellas balance so that they do not shake or blow over, even during windy days. It will keep your shade in place to shelter patrons from harmful UV rays, rain, and from the heat of those hot summer days. It works on any flat surface to create a low-profile design. This makes it an excellent addition to a portable table with space for an umbrella. If a table needs to be moved, simply remove the umbrella and base to move the table and then re-attach afterward. The unit has two knobs on it which can be tightened into place to make the umbrella even more securely grounded.
