

MyTCoat Puppy Tunnel

MSRP \$2,797.00

SALE \$2,378.00

Highlights:

- 30-inch diameter opening to fit most dogs
- Enjoyable activity that almost any dog will enjoy
- Molded from high density plastic to be hardy but gentle on paws
- Rounded corner make for a clean look as well as a safe piece of equipment

The MyTCoat Puppy Tunnel is a great activity for dedicated competitive dogs and playful pups alike. As an agility obstacle, it presents a challenge for dogs to dive through as swiftly as possible. But when dogs aren't being trained, they will still love playing in the tunnel. They can tumble through it, engage in a fun game of peekaboo, or even catch a short respite from the sun.

The Puppy Tunnel is designed to enhance both agility and obedience in dogs of various sizes. The primary purpose of this tunnel is to boost dogs' confidence in navigating confined spaces without having visual contact with their owners. Learning to follow commands without direct visual cues improves their focus and responsiveness as well as their ability to follow directions in challenging environments. Of course, using the Puppy Tunnel is also just plain fun for dogs, whether or not they're being trained.

The Puppy Tunnel has a 30-inch diameter, making it large enough for most breeds of dogs to comfortably fit through it. The tube and its square entrances are formed from high-density molded plastic. The squares and tubes can be customized with different colors, which you can specify with your order to create a piece that is specific to your dog park.

This product is great on its own or when paired with other dog park play items. Combine a Puppy Tunnel with a Three-Hoop Puppy Jump, a set of Weave Posts, and a Puppy Climbing Wall to create a fun and challenging obstacle course for your canine friends!
