Age Group: 6 months to 5 years

The Quadra Paint Panel is the ultimate place for kids to practice their creativity and art skills. It consists of four separate paint panels which are joined together at their posts. Each of the panels is double-sided, which means that the Quadra Paint Panel can be used by an entire classroom of children at once. The clear canvas panels allow the paint that is applied on one side of the canvas to be seen from the other side, encouraging children to work together to create complex masterpieces. Right below the clear portions, each side of each panel has several cup holders, which are perfect for holding different colors of paints for the young artists to use.
