SALE \$674.00

Highlights:

- Adorable scalloped edge
- Excellent place for toddlers to play
- Small sandbox at a standing height
- Sturdy posts and sides

Age Group: 6 months to 5 years

Rethink the modern sandbox with our adaptable and inventive Scalloped Sandbox Cube. At two feet deep, this sandbox makes an excellent “excavation” space in which caregivers can bury dinosaurs and other toys. Children will delight in discovering buried treasure and analyzing their archeological finds. Small enough to fit in a classroom, but spacious enough to foster collaborative, creative play, the Sandbox Cube gives children a place to dig, dirty their hands, and develop their fine motor skills. Crafted from 100% Recycled Structural Plastic, the Sandbox features a scalloped inside toy ledge and boasts stainless steel hardware. A coordinating cover (sold separately) is available in a heavy-duty outdoor material. ADA accessible, the Scalloped Sandbox is suitable for children as young as six months and comes fully assembled, so you can bypass construction and start exploring.
