---

The Triple Nature Bowl is the ultimate place for kids to store their outdoor finds. The large basins can be used to store anything, wet or dry, and are easy to clean thanks to the drainage holes and plugs at the bottom. Kids can split into three teams and compete to see who can fill their bowl first with pinecones, stones, or other outdoor objects. Nature Bowls even make the perfect terrariums for fish and other small animals. The Double and Triple Nature Bowls even have the additional option of including a drainage reservoir beneath one of the bowls, there is a water pump that can be used to continuously re-circulate the water.
