Assembled Dimensions: 48" x 32" x 28"

Perfect for educational demonstrations, as well as outdoor, nature-focused play, the Large Nature Table is the ideal place to store organic treasures and keep them safe from the elements. Whether your child likes to collect leaves, play in the sand, arrange found rocks and flowers, or experiment with water, the Large Nature Table's four divided areas keep its contents dry and organized. Plus, children will learn to sort and match "like" objects. The table's two reversible lids keep treasures secure. And, thanks to our unique design, it's portable; two back table legs include wheels that smoothly roll when lifted, making the 88-pound table mobile—especially for traveling educators and field lessons. The Large Nature Table is ADA accessible and double the size of our Nesting Nature Table, measuring 48" L x 32" W. Made from 100% recycled structural plastic, it's ADA accessible and features stainless steel hardware.
