**Age Group:** 6 months to 5 years

**Assembled Dimensions:** 146" x 66" x 95"

---

Pumphouse with Casa Grande Roof. Kids can use the streams of water to pretend to mine for gold, build block dams, and race rubber ducks and sailboats. The ultimate accessory for the sweltering summer months, the Pumphouse allows children to create and play for hours in the shade. Dual kid-activated pumps flow to fill identical troughs leading to water containers flanking the play structure. Water returns to the House's reservoirs via tubing, where it's collected to be pumped by kids through a filtered hose. The Casa Grande Roof adds a cabana-like feel to the festivities, and the structure's 100% Recycled Structural Plastic materials and stainless steel hardware make it durable and weatherproof. The Pumphouse is ADA accessible for water-loving kids of all ages and ability levels.
