- Great place for children to explore nature

Age Group: 6 months to 5 years

Assembled Dimensions: 146" x 66" x 40"

Perfect for playgrounds, children's museums, and outdoor learning centers, the Pumphouse provides hours of educational, aquatic fun. Kids will use streams of water to engage their imaginations; whether they're building dams, racing boats, or pretending to pan for gold, the Pumphouse is the perfect accessory to keep kids occupied while engaging their motor skills. Identical kid-activated pumps flow to fill dual troughs leading to water bowls on either side of the play structure. Then, the water returns to the Pumphouse reservoirs through tubing, where it's collected to be pumped again by kids through a filtered hose. This sophisticated play accessory is composed of 100% Recycled Structural Plastic and features stainless steel hardware. ADA accessible for inventive kids of all ages and ability levels.
