Can you tell me which one of these things is not like the other? With the Freestanding Shapes Panel, children will be able to answer that question, because you'll bring multisensory learning to your playground with our bright and educational accessory. The panel features shapes in different shades, as well as charming illustrations like a chicken hatching from an egg, the globe, a rocket, a sailboat, and more. The panel provides kids with movable cylinders they can arrange by color and likeness, or they can arrange them randomly to create a story. Shapes in the Freestanding Panel include diamond, square, rectangle, circle, oval, triangle, arrow, octagon, and even star. Ideal for children two and older, the Freestanding Shapes Panel is both fun and educational, and provides a great learning tool for parents and caregivers of young children.
