Age Group: 2 to 12 years

It is no secret that children's play equipment can take up a lot of space and create quite a mess. Keep your playtime and athletic equipment together in one space with this handy Ball Cart. It has a large nylon storage area which can be used to hold larger loose objects like sports balls. This can be used to hold a wide variety of equipment, so that kids have a lot of different games and sports to choose from. With the amount of space it contains, there is plenty of room to supply equipment for an entire class. The cart also contains some metal shelves, which can be used to hold more important or fragile things that can't be mixed in with the other equipment, such as clipboards, score sheets, plastic frisbees, and more. The cart is mounted on wheels which allow it to easily be transported from place to place.
