Use Zone: 14' 8" x 7' 0"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The 3-Foot Single Straight Hillside Slide turns a plain embankment into a part of your playground. This unit is built straight into a hill which is a great way to utilize your surrounding space that might otherwise be unusable. It also prevents children from falling from a slide as it hugs the hill's surface keeping the distance from the edge of the slide to the ground to a minimum. Add a unique landing zone with any of our excellent surfacing options to liven up this already amazing hillside. The top of the slide is fitted with a galvanized steel deck which provides a sturdy entry point onto the slide. This slide is made of rotationally molded plastic designed to withstand harsh weather and daily use making this an ideal investment. Kids will even get a bit of a workout running up the hill, sliding to the bottom and repeating the process. The 3-Foot Single Straight Hillside Slide is perfect for preschoolers who aren't used to climbing some of the taller freestanding slides. This fun hillside fixture will keep kids coming back for more.
