ASTM F1487-17

CPSC PUB #325

The 6-Foot Spiral Sectional Free Standing Slide is the best way to slide. The twisting ride to the ground is unmatched in its fun and novelty. Standing at an impressive 6-feet tall, this slide will be a child's first choice when visiting a playground, park or any play space. This unit has a steel staircase that leads kids to the top platform to the start of their adventure. The staircase treads are PVC coated perforated galvanized steel that provides traction. It prevents water damage by draining rain and other liquids off on the deck before it can cause damage. The slide itself is made of a hard plastic that is UV stabilized to hold its color for longer in the presence of harsh sunlight. Kids are going to line up for miles to try out the twisting fun of the 6-Foot Spiral Sectional Free Standing Slide.
