ADA Compliant

The Leadbetter Point play system is an awe-inspiring wonderland. Over 100 children can play concurrently, making this unit one of our largest and most social structures. The unit's layout fosters a healthy desire to discover. With a unit this size, many nooks and panels reward those exploring. This unit uniquely has three levels of play. Fun can be had on the ground with the Store Panel, Craggy Curved Wall and Single Drum. Once kids have scaled, numerous slides become accessible and if kids find the Vertical Ladder to the third level, the enormous Spiral Tube Slide awaits. It provides kids with a 9-foot plummet with a fun twist. Everyone feels included with the variety of both ground and elevated components and a Transfer Station that makes the system ADA compliant. No matter what a child likes, climbing, sliding, or thinking, the Leadbetter Point play structure has them covered.
