- Posts and decks are made from Recycled Structural Plastic (RSP)

**Age Group:** 5 to 12 years

**Capacity:** 45 - 69 children

**Use Zone:** 37' x 34'

The Bobcat Recycled Plastic Playsystem is a deep green treehouse-like structure that kids will have a blast playing in. The hexagonal decks offer activities in every direction. Younger kids can go up the traditional Hex Quadra Stepper stairs to reach the first deck while older kids can scale up the rectangular and cube grips of the Timber Wall Climber. On the other side, there is a Hex Dual Monster Rope Climber for the advanced climbers. Kids can crawl across the Hex Straight Rope Tunnel to reach the other deck. Once there, kids will find the 6-foot Wave Slide. Children can quickly play on the slide over and over by directly accessing it via the Pipe Wall Climber, 6-foot Rope Climber, or the twisting Vortex Climber. A striking picture of a bobcat is on one of the panels as an ode to nature. Taking it to heart, Play Mart builds the posts and decks from Recycled Structural Plastic to help keep trash out of the wild. The Bobcat Recycled Plastic Playsystem is available in four colors to personalize the structure to your preference.
