

Longs Peak Recycled Plastic Playsystem

Price \$69,320.00

Highlights:

- Large selection of climbing activities keep kids busy
- Hexagon covered roofs protect the decks
- Uses recycled plastic in its construction
- Features to help improve coordination and enhance strength

Age Group: 5 to 12 years

Capacity: 69 - 95 children

Unit Size: 48' x 42'

The Longs Peak Recycled Plastic Playsystem by Play Mart was built for active and energetic children. This structure boasts a plethora of climbing options of varying difficulty. Kids can start off on the Hex Rope Net Climber or the Hex Timber Wall Climber for an easy warm-up. Once they are ready, they can start the obstacle course full of climbers next to the hexagonal decks. The athletes can start on the Deep Rung Loop Climber and make their way to the Double Job Ring Ladder. Two slides on the decks create a finish line to reward children for all their hard work. This structure features hexagonal decks with roofs. They provide shade and protect the deck from rain and help prevent structural color fading. The six-sided platforms provide more room for activities than the traditional square or rectangular decks. Furthermore, a portion of the structure features recycled plastic in its build, making it an ideal playground for environmentally conscious organizations.
