- Hex Roof provides shade
- Condensed, vertical design will fit small venues
- Incorporates recycled plastic in its construction

Age Group: 5 to 12 years

Capacity: 19 - 25 children

Use Zone: 21' x 31'

Play Mart's River Otter Recycled Plastic Playsystem is a sublime playground for small organizations that do not have large play areas. The structure packs all of a playground's essential activities in a vertical build. A hexagonal design provides six spaces to place fun activities, more than the usual square decks. Additionally, it is covered with a Hex Roof to keep children cool and protected from the sun's rays during the summer days. There is a neat selection of climbers available. Younglings can hike up the mountains with the Rock Climber, ascend up the geometric shapes of the Timber Wall Climber, or twirl around the Lazy Loop Climber. Young minds will marvel at the spinning wheels of the Gear Panel. A small wave slide completes the unit. A cute photograph of a river otter provides the finishing touch to the charming structure. Inspired by nature, the playset is designed using recycled plastic to become environmentally friendly.
