

Tree Hugger Recycled Playset

Price \$35,524.00

Highlights:

- Designed to build around an existing tree
- Take advantage of natural shade
- Multiple physical challenges, pretend play spots, and activities
- Heavily incorporates recycled plastic material

Age Group: 2 to 12 years

Capacity: 59 - 71 children

Use Zone: 40' x 27'

Play Mart's Tree Hugger Recycled Playset is a cleverly designed commercial-grade playground unit that seamlessly blends existing natural landscape into the man-made construction of a children's activity center. The central point of the primary elevated decking is built to go around an existing tree at your school or playground. This tree then provides both natural beauty and shade over the location kids will be running to and fro. The structure itself is "green" as well, given its decks, posts, rails, and stairs are built largely from recycled plastic. Children might be interested in these facts, but it is likely they will be too busy having a hoot scrambling up a Rock Wall, giggling at the shapes seen through the two Teleidoscopes, or swooshing down to the ground on the Double Slide. The ability to build around a tree is not only an impressive visual; it permits you to retain an existing part of the landscape and still install a major play structure in a smaller place.
