CPSC PUB #325

There's a topsy-turvy ride in store for any child who steps onto the Orbital Spring Sitting Bouncer. A seat of smooth, thick polyethylene plastic is durably constructed to withstand weather and daily use to maintain the overall appearance. The frame and springs are made from strong steel and powder-coated for rust protection. This bouncer is made to last, built with high-quality commercial grade materials. The function of this unit is easy to figure out for even the youngest children. Kids are invited to pick any of the three seats, grab the steel circle handle and start moving back and forth or side to side for a wild ride. Maybe they will pretend it is a UFO and work out a crash landing. Or perhaps it's a raft whirling through the whitewater rapids. Whatever adventures they come up with, the Orbital Spring Sitting Bouncer is sure to inspire the wide-open imaginations of children. Contact the AAA State of Play sales team to provide a thrilling ride at your playground.
