Footprint: 3' 4" x 11' 10"

Use Zone: 14' 8" x 7' 0"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Maximize your playspace with the 6-foot Single Straight Hillside Slide. This unit lets you incorporate nature into the play area by turning your hill into a slide! Since it attaches to an elevated area, it does not come with a ladder. This promotes physical fitness as kids have to run up the hill to reach the top of the slide. Because of this, an existing play structure is not needed and it is easier to install than a regular slide. The slide uses the ground as its base which reduces the fall height and thus lowers the risk of injury. This makes it safer than traditional slides and is a perfect ride for beginners. The 6-foot Single Straight Hillside Slide is ideal for preschools, elementary schools, churches, and other organizations that regularly have young children in attendance. To withstand the test of time, rotationally molded plastic is used to create a strong and durable unit.
