**Age Group:** 5 to 12 years

**Capacity:** 3-6

**Use Zone:** 16' 3" x 20' 5"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Curved Post Tilted Pebble Bridge is an excellent outdoor recreation unit that presents an enjoyable set of tilted platforms to maneuver across. School-age children will find their journey from end to end is enhanced by some key features of this independent play product. The curved posts at either side of the pebble trail each have a low horizontal bar that kids can use to step onto the first foothold. The round pebble steps have beneficial texturing that improves shoe grip to minimize slips. There are vertical bars that emerge through the top of each pebble that children can use to hold onto if they're needing help staying upright. These bars are attached to the overhead rung and securely fastened into the ground to ensure each platform is stable. As each pebble step is a little bit askew, kids will have to work a bit harder as they play, encouraging improvement of their body coordination and balance control. The Freestanding Curved Post Tilted Pebble Bridge can be purchased in the colors shown or customized to your specifications. Please call or email AAA State of Play to learn more.
