Installing a swing set with sun shade adds great value to any school, daycare, park or church playground. It eliminates the burden of searching for the appropriate shade for a swing set by combining the swing chair with shade into one package. And that makes choosing SRP's Single Post Swing with Shade a no-brainer decision! A ten foot wide shade canopy is built into the swing structure over powder-coated steel posts. This Single Post Swing offers versatility with its compact, streamlined design and custom color options for the posts and shades. To assure this element suits all of your play area needs, simply choose the number of bays (from one to four) and then decide whether you need seats and chains. This eight foot high swing frame is available with two, four, six, or eight belt seats and the components needed for proper installation. Alternatively, if you already have swings and hardware, you can purchase the swing frame with shade by itself. The durable, high-quality shade for this swing set keeps the seats and general play area cooler, allowing kids to enjoy outdoor activity throughout the sunny months while reducing exposure to the sun's harmful UV rays. Additional or alternate seating is available, including bucket and ADA seats, making this single outdoor swing ideally adaptable to elementary or preschool ages. This swing with a shade fosters beneficial kinetic play for all ages while improving spatial awareness and motor skills.
