Use Zone: 20' x 20'

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

Climbing is a natural activity for kids, and the Geodome Climber enables them to do just that. In addition to promoting grip strength as well as general core strength, the Geodome Climber helps kids foster a sense of spatial awareness, all of which are vital for young, growing children. Thanks to its dome shape, the Geodome Climber offers multiple avenues by which kids can reach the summit; they can start outside the Geodome and climb the exterior, or they can start in the middle, jump up, and pull themselves up to the top. The Geodome Climber functions like a set of three-dimensional monkey bars, and kids will relish the chance to test their climbing mettle. From preschoolers to middle schoolers, kids will love getting out onto the playground and surmounting this innovative climber.
