

Basic Rubber (Swing / Slide / Deck) Mat

MSRP \$150.00

SALE \$120.00

The Basic Rubber Mat is designed for use in high traffic areas under playground equipment to limit the loss and displacement of loose fill kick out areas on the playground. The rubber surface of each mat offers shock attenuation, long wear, accessibility, and low maintenance. Each mat is 2 inches thick. Various sizes are available for specific uses. The six-foot long mat works best with swings. The smaller mats work well with slides and climbers. Unlike many of our other swing mats, the Basic Rubber Mat does not include beveled edges and should be buried level with the surfacing to eliminate a tripping hazard. Many beveled edge swing mats are available at a slightly higher cost and do not require any burying.
