COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Royal Double Dip is an upper body shaper like none other. Designed for budding teenagers, fluffy adults and everything in between. This station can accommodate two users at once or three if you opt for the Triple Royal Dip Bars. Get your body toned for the beach or tighten your body up to slip into a fancy dress. This unit comes with an instructional guide mounted to the front and clearly instructs users on how to do the exercise properly. Several muscle groups benefit from dipping on the Royal Double Dip; including triceps, front shoulders, quads and abs with the proper body placement and movement. The powder-coat painted steel prevents rusting that normally occurs from outdoor exposure. This makes the equipment last longer and in turn creates healthier lives for all those who use it.
