### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Ski your way into a healthy lifestyle on the Single Country Skier. Grasp the handles while moving your legs in a walking or running motion to embark on an exercise session that is gentle on the knees. Great for your heart, legs and core, patrons will swarm to use the unit as part of their outdoor workout routine. Other benefits of cardio exercise include: stress reduction, mood improvement, and better sleep quality. If your outdoor venue has a large number of patrons and frequently experiences heavy traffic, the Royal Country Skier Station and Triple Royal Country Skier have you covered. The Single Country Skier is made of steel that has been powder coat painted. This prevents rusting and gives it a dazzling shine. The steel is also durable enough to handle heavy use and daily weather; making this an ideal outdoor addition.
