- Comes with heavy duty, zinc coated hardware
- Hole diameter for surface mount frame is 1.5-inch

The Recycled Plastic Trailside Park Bench by Frog Furnishings is a great seat for outdoors hiking trails or park paths. The bench allows seating in both directions for more use and versatility. Since it is made from recycled plastic it is also environmentally friendly, while still maintaining a durability that will last against seasonal changes. It is made from four 4-inch x 4-inch Resinwood slats, which is a recycled plastic material known for durability, and has black powder-coated structural steel frame bases. The bench is available in cedar, gray or green. Heavy duty, zinc coated hardware comes with the bench. The Recycled Plastic Trailside Park Bench is available as surface mount or in-ground mount. The bench comes with surface wedge anchors for mounting, and the powder-coated steel bases have predrilled holes, 1-1/2-inch in diameter, for easy Do-It-Yourself installation.
