Age Group: 3 years and up

Unit Size: Seat 15" high, Handlebars 25" high

Do you remember the days of riding double on a seat or the handlebars, which typically resulted in injury? Well, the MyRider Chariot eliminates the need to engage in such tempting and dangerous acts because it is built for one or two to enjoy. One child operates the pedals while the other stands on a nonslip platform and enjoys the ride. There are no spokes to be concerned with and the handgrips are made from a heavy duty rubber that is comfortable to hold onto. The yellow frame is made from durable, welded steel that has been powder-coated to resist scratches and rust while the nylon bearings are self-lubricating and made to last. Assembling the MyRider Chariot is a breeze, and it comes with a 5-year warranty.
