If you are a teacher or helper, you likely dread rainy and snowy days. If spring and fall jackets are not enough to keep organized, unfavorable weather comes with boots, scarves, hats, mittens, and umbrellas. Would it not be nice to have a way to keep belongings organized according to child? The Value Line Preschool-Age 5-Section Locker does just that! In addition, there are shelves up top and spaces below to keep school supplies, snacks or anything else that typically leaves a room looking like a tornado blow through. This is a unit that will continue to look spectacular for many years as the maple-faced melamine panels are resistant to scratches and stains and clean off easily, so muddy boots and spilled juice boxes do not have to ruin your day. All hardware and tools needed for assembly have been included and you receive a lifetime warranty on materials and manufacturing defects. The locker is made in the USA.
