The Green Aluminum Junior Bag Dispenser by DOGIPOT makes it easy to improve your community's efforts to pick up their dogs' waste. This powder coated forest green box is made of tough aluminum, so you never have to worry about it holding up and holding its bags in every season. Since dogs have to go no matter the weather outside, that's a real boost to your local pickup efforts. Another boost will be the impressive 400 bag capacity, allowing you to provide free bags without having to add more supply all the time. The Green Aluminum Junior Bag Dispenser is also easy to spot and easy to use. Its two diamond bag dispenser slots and front locking access panel make it easy to grab a bag or load new ones. With clear instructions right on the front, there will now be no excuse leaving a dog's leavings in community areas. If this dispenser isn't right for you, consider some of DOGIPOT's other options, including: Green Aluminum Header Pak Junior Bag Dispenser,
